## About us

Mech Tech Engineering Solutions is a Chennai-based company that specializes in the following services:

Conveyor Services | Filtration | Separation | Purification

With 17 years of engineering expertise in these areas, we have gained strong knowledge in both conveyor automation and filtration through our experiences working with industry giants like MIVEN MAYFRAN & PALL FILTERS (INDIA).

Our commitment is to provide complete solutions to our clients, enabling us to meet their needs effectively.

**Furthermore, we are proud to be authorized sales and service partners for Universal Conveyors**

### We excel in three key areas that set us apart:

#### On-site expertise

We handle all types of conveyor work directly at your site, including complete trough modification and fabrication, ensuring convenience and efficiency for our clients.

#### Comprehensive support

We offer complete support for chip conveyor spares and service, accommodating both imported and domestic makes, to guarantee uninterrupted operations and peace of mind.

#### Filtration excellence

Specializing in delivering comprehensive filtration solutions, we enhance your current filtration system to extend fluid life and optimize performance, contributing to cost savings and operational efficiency.
